Subject Index to Volume 3 (1986)

absorbtion, 108
acetylcholine, 162
acylglycosyloxy alkaloids, 240
additivity rules, 65
amaryllidaceae, 240
aminodarone, 167
8-aminoquinoline, 170
analgesic testing, 263
anticholinergics, 327
antihemophilic factors, 364
antipyrine, 156
antiviral nucleoside, 112
Aspergillus ochraceus, 170
Athereosclerosis, 52

betamethasone, 244
binary powder mixtures, 65
bioassay, 302
bioavailability, 108, 253
blood brain barrier, 81, 278
bradykinin, 162
brain microvessel endothelium, 81

calf brain, 327
cancer chemotherapy, 311
capping, 65
carbopol, 214
carboxyprimaquine, 132
Crinum asiaticum, 240
catalepsy, 162
cefixime, 150
cellulose water interactions, 187
cephalosporin, 150
chemilumescence, 271
cholesterol, 93
cholesterol lowering agents, 286
codeine, 45
compact hardness tests, 12
compactibility, 12, 65
compressibility, 12, 65
compression, 65
compression equations, 12
conjugate synthesis, 132
controlled drug delivery, 318
cyclosporin A, 48
cytochrome P-450, 156
cytotoxicity, 302

DHPG, 112
dibromoculcitol, 302
diffusion, 21
diethylcarbomazine, 75
dimensions, 356
dissolution, 88
diuretics, potassium-sparing, 102
dogs, 123
dopamine, 7, 162
drug absorbtion, 123
drug carrier, 35
drug delivery, 23, 81, 225, 244, 318, 333
drug interaction, 167
drug metabolizing enzyme activity, 156
dynamic light scattering, 214

electroosmosis, 318
endorphins, 56
endorphins, 142
endothelium, 81
enhanced rectal absorbtion, 116
enkephalins, 162
ethyl cellulose, 230
excised skin, 356

fieldscreening, 132
filariasis, 75
floating formulations, 208
fluorescent dyes, 56
fusogenic lipid, 116

gas chromotography, 298
gastric emptying, 208
Gastrointestinal
  drug absorbtion, 123
  mobility and pH, 123
  tract, 123
  transit, 123
gels, 21
gel formation, 230
glucose-6-phosphate dehydrogenase, 290
glucluronide, 132
glycine conjugate, 132

heterogeneity, 327
hexyl nicotinate, 294
high performance liquid chromatography, of peptides, 142
homopthalimide, 286
human epidermis, 61
hydrophilic compounds, 345
hypolipidemic agents, 286
hypolipidemic activity, 93

immunostimulant, 307
immunosuppressive activity, 48
induction, 156
inhibition, 156
intranasal, 108
interferon suppository, 116
intestine, 345
intestinal absorbtion, 35
iontophoresis, 318
in vivo methods, 263

leukotriene B4, 271
lipid, 23
liposome, 23
long acting drugs, 56
lycoriside, 240
lymphotropic delivery, 116

mast cells, 240
malaria, 290
malnutrition, 352
mangiferin, 307
MAO, 7

powder, 88
powder compression, 12
preparation, 356
primary culture, 81
primaquine metabolism, 290
prodrugs, 333
progestins, 278
promotive absorbtion, 35
propanolol, 108
prostaglandins, 162
pyrrol derivatives, 271
pyrrolopyrimidines, 271

quaternary ammonium derivatives, 298

rabbit, 52
radiochemical degradation, 360
radioiodinated cholesteryl iopanate, 52
radiolabeled degradation products, 360
rats, 156, 352
receptors, 56
receptor interaction, 327
recombinant DNA, 195
renal clearance, 150
reversible metabolism, 173, 178
RIA, 112

saturable protein binding, 150
serotonin, 162
single dose, 173
skin permeation, rats and dogs, 225
soft gelatin capsules, 230
solid dispersions, 41
starch-water interactions, 187
sterility testing, 364
sticking, 65
strength of a compact, 65
sublingual, 108
sulfamerazine suspensions, 118
sulfinpyrazone, 173, 178
surface active ingredients, 298
suspensions, xanthum gum, 118
sustained delivery of drugs, 278
sustained release, 230

theophylline, 156, 167
therapeutic proteins, 364
thermal decomposition, 298
thermal stability, 41
thonzonium bromide, 298
timolol, 225
tolnaftate, 88
topical, 88
topical drugs, bioavailability, 233
transdermal drug delivery, 318
triamterene, 102
triglyceride lowering agents, 286
tritium decay, 360
tubular reabsorbtion, 150

ufasome, 35
urea, 294

variability with age, 61

water-excipient interactions, 187
water-polymer interactions, 187
water vapor sorbtion, 187

xanthum gum suspensions, 118
xanthene-C-glucoside, 307
